Notes:
- All resistors value are in ohms. ($R = 10^3$Ω, $M = 10^6$Ω)
- All capacitors value are microfarads. ($C = 10^{-6}$μF)
- Tolerance of all resistors is $K = \pm 10\%$
- Tolerance: $K = \pm 10\%$. Tolerance of all capacitors (except the electrolytic capacitors) is $M = \pm 20\%$ unless otherwise indicated.
