The Amplifier AF43

Supply Switching Section (Rectifier on AF43 Board)

Power Amplifier AF43

Notes:
1. Some models may have a 0.1A carbide in series with the signal at this point.
2. IC 1 is a 4558 dual operational amplifier.
3. IC 2 is a TDA2030 audio power amplifier.
4. The supply is omitted from the circuit drawing for clarity.
5. In battery operation position, the supply to the board will be that which is attached to the battery swap terminals.
