Pre-Amplifier AF 44

Power Amplifier AF 44

Power Supply Unit AF 35

NOTES:
1. All ICs 4558 Dual Operational Amplifiers.
2. 2.16V Supply for Pre-amp is obtained through 2 1kΩ 1/2Watt Resistors with 2 1kΩ Taper D-law (B2X 61 C-16) to earth to give low current regulation. Also there are 2 0.1μF Capacitors and 2 1000μF 16V Capacitors between the supply lines and earth (OV).
3. BC 550's may be 182 or 171A.
